

Aquabar

Mains-fed Water Cooler

The Aquabar is a high-capacity water cooler which can dispense an impressive 80 litres per hour. It is designed to supply very large quantities of ambient, chilled and sparkling water on demand, making it ideal for use in large businesses, restaurants, and school canteens. Not only is it functional, but the attractive stainless steel design is perfect for a customer-facing role.

Ambient & Cold

Three dispense buttons with a push and hold option or a continuous dispensing option.

The large dispensing area is designed to accommodate tall glasses, bottles, jugs, and carafes with ease.

Unique Direct Chill 'Ice Bank' technology guarantees a significant cooling capacity, providing ice cold water even in the most demanding environments.
