Top quality drinking water products for all sectors

The Water Cooler Company is a proud member of the Culligan family

# BETTER WATER, BETTER WORLD

From a single glass of water to a whole-home solution and from pure function to high style, the Culligan family of products has something for every home or office. **Whatever your water needs, we're ready to exceed them.**

**We are Culligan;** our job is to provide sustainable drinking water solutions for any type of specification. Our extensive range of WRAS-approved drinking fountains, water refill stations, and water dispensers include products from OASIS, Blupura, Zip, Instanta and other industry leading manufacturers.

We provide drinking water products for all sectors, including construction, commercial, education, healthcare, HORECA, and offices.

Our hygiene range utilises the latest technology to keep drinking water safe and clean: fountains with components made of copper, with its antimicrobial properties; units featuring UV-out kill bacteria at the point of dispense; bottle fillers with hands-free operation, and dispensers with wipe-clean touch screens.

This helps ensure the provision of safe drinking water in high-usage environments such as offices, gyms, schools, and public spaces.

**We'll provide you with access to the latest drinking water innovations.**

# Our Story

Culligan's legacy is one of innovation. In 1936, Emmett Culligan started his business with a vision for delivering better water to homeowners.

Today, with over 35 brands in 90 countries, Culligan International makes a real difference in the health and wellness of people throughout the world by providing clean water efficiently through eco-friendly products and exceptional customer service.

## PURPOSE AND VALUES

### THE CULLIGAN PURPOSE

At Culligan, we are passionate about water because we are passionate about people. Because water is a need we all share, no matter who you are or where you come from. It's a common bond that helps us thrive as individuals and as communities, and it's something everyone should be able to access.

We strive to make a real difference in the health and wellness of people throughout the world by providing cleaner, safer, and great-tasting water. It's our passion, our purpose, and our commitment.

# OASIS POLARIS COUNTER-TOP WATER COOLER

The Polaris from Oasis guarantees to meet all your beverage needs with tri-temp water options. Both stylish and functional, this water cooler makes the perfect addition to any countertop in need of a compact refreshment solution.

The Polaris countertop mains-fed water cooler provides all the water you need in compact machine, while the large dispense area caters for sports bottles to be filled with ease.

## KEY FEATURES

- » Compact and powerful
- » Tri-temp: Chilled, Hot and Ambient water from a single dispense point
- » Large drip tray to catch any spills
- » Strong polymer cabinet will not scratch your counter-top
- » Portion Control: Two options for dispensing: choose from 3 pre-selected cup sizes or any size

# CULLIGAN SELFIZZ COUNTER-TOP WATER COOLER

The Selfizz Water Cooler from Culligan provides filtered water and serves still and sparkling water with multiple options to satisfy every taste of each user.

The innovative design of Selfizz includes multiple water options; meaning you will have perfectly chilled, filtered water with the highest quality sparkling water, instead of bottled sparkling water, saving you time and money.

## KEY FEATURES

- » Dispenses multiple water options; ambient, chilled, sparkling and hot water
- » Modern, compact counter-top model suits any space
- » Easy to use, simple design
- » Modern LED buttons
- » Large, illuminated dispensing area
- » Direct Chill technology chills the water quickly and efficiently
