

Kalix Contactless

Mains-fed Water Cooler

The Kalix Contactless water cooler is equipped with a foot controlled dispense to reduce the spread of germs, providing safe and hygienic drinking water all day long. This machine is able to produce up to 240 cups of chilled water per hour thanks to Direct Chill technology, making it an ideal water appliance for high usage environments. This contactless foot pedal activated water dispenser with optional UV filtration provides the ultimate safe and hygienic drinking water experience.

Chilled

Spacious water dispensing area allows for bottles and carafes to sit beneath the dispenser with ease and stability.

Efficient Direct Chill two piece pressure cooling tank ensures for chilled water within seconds.

Foot pedal operated water dispense is a hygienic alternative to high-contact buttons which could harbour germs.

Kalix Contactless

Mains-fed Water Cooler

Key Features

CONTACTLESS

The contactless foot pedal operated design provides clean and safe drinking water. Zero hand contact is required which eliminates the risk of the spread of germs.

DIRECT CHILL

Direct Chill technology provides an instant delivery of chilled water. It also has significant hygiene benefits as the water does not come into contact with air until it is dispensed.

OASIS BRAND

The OASIS brand is a recognized worldwide leader in the design and manufacturing of bottled and mains-fed water coolers.

Technical Specifications

TECHNICAL SPECIFICATIONS	
SIZE (LxDxH)	320L x 380D x 1120H mm
DISPENSING POINT HEIGHT	280 mm
WEIGHT	24 kg
LITRES PER HOUR	20 L/H
WATER TEMPERATURE	5-12 °C
OPERATING PRESSURE	1-3.5 bar
WATER SUPPLY	instantaneous connector Ø 1/4"
COOLING TECHNOLOGY	Direct Chill
POWER SUPPLY	single-phase 220/240 V - 50 Hz
MAXIMUM POWER CONSUMPTION	100W
CERTIFICATIONS	CE
